1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Hani Z. Sayed on February 2, 2007.

The application has been amended as follows:

Claim 30, line 5, the word -- the -- has been inserted before "first front",

In line 5, the word "position" before "container" has been changed to -- positioned --, and in line 8, the phrase -- relative to the frame -- has been inserted after "distal position".

2. The following is an examiner's statement of reasons for allowance: Grams et al. (6,371,717) shows a robot arm, a frame, and a plurality of bottle gripping heads to grip large bottles wherein the gripping heads are permanently fixed to the frame. The reference does not show or suggest a first gripping head capable of displacement from a proximal position to a distal position relative to the frame to reach through the front space into the rear space for gripping the rear container. Claim 30 recites a rack having a front space storing a first front container and a rear space storing a second rearwardly positioned container and the patentably weight has been given in combination with the gripping structure of a first gripping head capable of displacement from a proximal position to a distal position relative to the frame to reach through the front space into the rear space for gripping the rear container. Grams et al. (6,371,717) is incapable of displacement from a proximal position to a distal position relative to the frame to reach through the front space into the rear space for gripping the rear container.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
